[281888283/](#)

I'm a React Web application developer with experience in building responsive and optimized web application using the latest technologies and practices in a remote environment for a year and a half and now on-site for half a year. I've worked on different kind of projects such as SPA's, landing pages, e-commerce while keeping the design as per provided by the UI/UX team.

---

## Technical Skills

- **Front-End:** HTML5, CSS3, JavaScript, React.js, Vue.js, Tailwind CSS, Bootstrap, Redux
- **Back-End:** Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Designing:** Figma
- **Version Control:** Git, GitHub
- **Tools/Platforms:** Visual Studio, VS Code, NPM, Postman, Thunder Client
- **Other Skills:** REST APIs, Agile Development, Responsive Design, Optimization

---

## Projects

### HarryPhoto – Photo Gallery Website (2024)

- Developed a MERN stack photo gallery application using React and Tailwind CSS on the frontend and Express, Node.js, and MongoDB on the backend.
- Used Context API, Reducer function and Custom hooks for better data handling.
- Use of Figma with daily website design updates.
- Designed a few pages on Figma for the footer section.
- Integrated secure payment using Stripe API.
- Integrated Google oauth API for google login.
- Created a custom bot for customer service using React-Chatbotify.
- Use of Multer library for file uploading on the database.
- Use of Postman and Thunder Client for API testing.
- Implemented lazy loading for faster initial load time.
- Reduced initial page load time from 10 seconds to 2 seconds.

### Portfolio Website (2024 -Present)

- Developed a Single page portfolio resume using React, Tailwind CSS, Swiper.js, and Email.js.
- Use of Typescript for better error checking.
- Use of Figma for the website design.
- Used lazy loading to reduce the initial page load time.
- Keeping it updated according to expertise updates in life.

### Blucomm Technologies – Official Website (2024)

- Developed a MERN stack official website of BluSquare Technologies using React and Tailwind CSS on the frontend and Express, Node.js, and MongoDB on the backend.
- Use of Figma with daily website design updates.
- Integration of react components into the website provided by other team members.
- Use of Postman and Thunder Client for API testing.
- Continuous code pushing into the repo for other team members.

---

## Experience

OCTOBER (2022) – OCTOBER (2023)

**Front-End Web Developer Intern (Remote)** / Poiesis Technologies, Bahria Town, Islamabad, Pakistan

- Review, discuss and plan the required framework and libraries with the product manager for website development.
- Use of Figma and the website design provided in it by the UI/UX team.
- Use of HTML5, Custom CSS, and Bootstrap for the development.
- Making use of the reusable code as much as possible.

MAY (2024) – AUGUST (2024)

**MERN Stack Developer Intern (Remote)** / BlueSquare Technologies, Islamabad, Pakistan

- Develop Responsive and Optimized React Web Applications using the best market practices and personal knowledge.
- Use of Figma, React, Tailwind CSS, Nodejs, Express, MongoDB, Custom Hooks for the development.
- Daily scrum meetings for progress update, code review and bug fixing.
- Daily code pushing on the GitHub repository.

JANUARY (2025) – PRESENT

**Associate Software Engineer (On-site)** / Envio by Vista, F-8 Markaz Islamabad, Pakistan

- Continuous Testing and Debugging of the Logistic Software built in React 17.
- Occasional Testing and Debugging of the Inventory Software built in Vue 2.
- Synchronize The class and functional based components in React so the application doesn't break.
- Develop new modules and components using latest Functional components, Redux, SCSS, and Material UI components.
- Integration of APIs provided by the Laravel team into the React frontend and APIs by Flask team into the Vue frontend.
- Daily scrum meetings for progress update, code review, bug fixing, and future planning.
- Daily PR and merging on the GitHub repository for Development and Production Environments for both software.

---

## Education

2019-2023

**Bachelor of Software Engineering** / National University of Modern Languages, Islamabad, Pakistan
